ANDREW J. DUTCHER

Index – Journal of Creative Behavior, Volume 39, 2005

Appropriateness and problem solving
Creativity, originality, and appropriateness: What do explicit instructions tell us about their relationships 137

Art students
Educational intervention and the development of young art students' talent and creativity 237

Art teachers
Teachers who create, artists who teach 111

Artistic creativity and production
Innovation motivation and artistic creativity 35

Assessment of creativity
Artistic and scientific creative behavior: Openness and the mediating role of interests 217
Predicting work azctivities with divergent thinking tests: A longitudinal study 149

Budget and success criteria
Cinematic creativity and production budgets: Does money make the movie? 1

Chinese creativity
Creativity in troubled times: Factors associated with recognitions of Chinese literary creativity in the 20th century 57

Cognitive behaviors
Creative thought as a nonDarwinian evolutionary process 262

Concepts of creativity
Teachers' conceptions of creativity and creative students 17

Creative achievement
Linking the physical work environment to creative context 169

Creative process
Artistic and scientific creative behavior: Openness and the mediating role of interests 217

Creative products
Cinematic creativity and production budgets: Does money make the movie? 1
Effects of explicit instruction to "be creative" across domains and cultures 89

Creativity and intelligence
Relation of creativity to fluid and crystallized intelligence 123

Creativity courses — higher education
Survey of creativity courses at universities in principal countries 75

Cross-cultural research
Effects of explicit instruction to "be creative" across domains and cultures 89

Crystallized intelligence and creativity
Relation of creativity to fluid and crystallized intelligence 123

Definitions of creativity
Teachers' conceptions of creativity and creative students 17

Divergent thinking testing
Predicting work activities with divergent thinking tests: A longitudinal study 149

Evolution of creative thought
Creative thought as a nonDarwinian evolutionary process 21

Expectations and values
Innovation motivation and artistic creativity 35

Explicit instruction
Effects of explicit instruction to "be creative" across domains and cultures 89

Facilitation of creativity
Effects of explicit instruction to "be creative" across domains and cultures 89

Fluid intelligence and creativity
Relation of creativity to fluid and crystallized intelligence 123

Idea generation
Creativity, originality, and appropriateness: What do explicit instructions tell us about their relationships 137

Instructional delivery
Students' multi-modal re-presentations of scientific knowledge and creativity 193

Intelligence
Relation of creativity to fluid and crystallized intelligence 123

Longitudinal research
Predicting work activities with divergent thinking tests: A longitudinal study 149

Memorial
Ellis Paul Torrance . . . In his own words 69

Originality and problem solving
Creativity, originality, and appropriateness: What do explicit instructions tell us about their relationships 137

Personal expertise
Educational intervention and the development of young art students' talent and creativity 237

Prediction of creative activities
Predicting work activities with divergent thinking tests: A longitudinal study 149

Problem solving
Creativity, originality, and appropriateness: What do explicit instructions tell us about their relationships 137

Educational intervention and the development of young art students' talent and creativity 237

Production cost and creative products

Cinematic creativity and production budgets: Does money make the movie? 1

Professional characteristics

Teachers who create, artists who teach 111

Social behaviors

Linking the physical work environment to creative context 169

Teaching and learning

Students' multi-modal re-presentations of scientific knowledge and creativity 193

Teaching creativity in the classroom

Teachers' conceptions of creativity and creative students 17

Team productivity

Linking the physical work environment to creative context 169

Work environment — characteristics

Linking the physical work environment to creative context 169

Writers and their personal experiences

Creativity in troubled times: Factors associated with recognitions of Chinese literary creativity in the 20th century 57

Writers — personal characteristics

Creativity in troubled times: Factors associated with recognitions of Chinese literary creativity in the 20th century 57
